

**WORLD CLASS
WEBINARS**
PRESENTED BY PDPW

“Breathe Easy with Ventilation”

PRESENTED BY: Dr. Nigel Cook

Always LIVE on a Wednesday, from Noon – 1:00 p.m. CST **

(See note below.)

Participate in both sessions or select just one.

Wednesday, January 11

CHALLENGES OF NATURALLY VENTILATING COW BARNs

Cover the basic design concepts required for effective natural ventilation and examine why some are struggling to keep cows cool in these facilities during the summer. Before you think of designing your next modernization or building project, gather your team to take in this webinar that will help you avoid costly mistakes that limit air intake and ultimately profit potential. We'll cover air quality, movement and cooling. We'll also provide financial returns for different ventilation options. This series will be a great one for you and your team to watch together.

Wednesday, February 15

DO YOU CROSS, TUNNEL OR SOMETHING ELSE? MECHANICAL VENTILATION OPTIONS FOR COW BARNs

Discuss the pros and cons of different mechanical ventilation systems, with an emphasis on cross and tunnel ventilation. An economic model will be used to highlight the differences. This webinar is a must for anyone considering renovation or construction. Gain a first-hand look at the numbers that make economic sense and optimize cow comfort.

Sign up today online or call PDPW!

*PDPW members cost is \$100 per webinar. Save when you sign up for both at \$175.
Non-PDPW members cost is \$125 per webinar. Save when you sign up for both at \$225.*

**** If you have a date/time conflict, you can watch a fully recorded version at your leisure.
You must be registered to receive a recorded session.**
